- On Thursday, September 12, 2024, Mr. Luke Brogden brought his Professional Communications class from Dobyns Bennett Excel High School to tour Holston Valley Broadcasting. The group of around 12 arrived around noon and stayed for about 90 minutes. The purpose of this tour was to educate these high school students about the variety of careers within the radio and television industry. We discussed equipment, technology, targeting demos, how media consumption has changed, revenue generation, and more. The students were able to visit the studio while one of the DJs was on their air shift. They were also able to visit the audio production room and see how production and editing occurs. We also toured the TV studio where we discussed the green screen, camera set-ups and local programming vs. syndication.

The students were extremely enthusiastic , saying it was the most exciting field trip they

had ever taken. They were very surprised at the variety of positions behind the scenes it takes to make a broadcast station run smoothly.

We also discussed ways to get your foot in the door in any industry or with any specific company such as learning about the company, requesting a tour, and consulting with the company's Human Resources department on any internship opportunities (paid or unpaid). We also spoke of the value of immersing yourself in an industry to learn more about it.

They discussed and observed various departments within the radio station including programming, promotions, sales, news, traffic, and production. The students were able to do some hands-on learning in the studios as well as meeting some of our DJ talent.

The students had a chance to observe the behind-the-scenes technology and processes involved in producing live and pre-recorded content on TV. During their visit they learned about production of our local public service program as well as a faith-based program led by a local pastor. They gained insight into camera operations, audio control, video switching and automation for master control.
